

Line Chart (Sales Over Time)

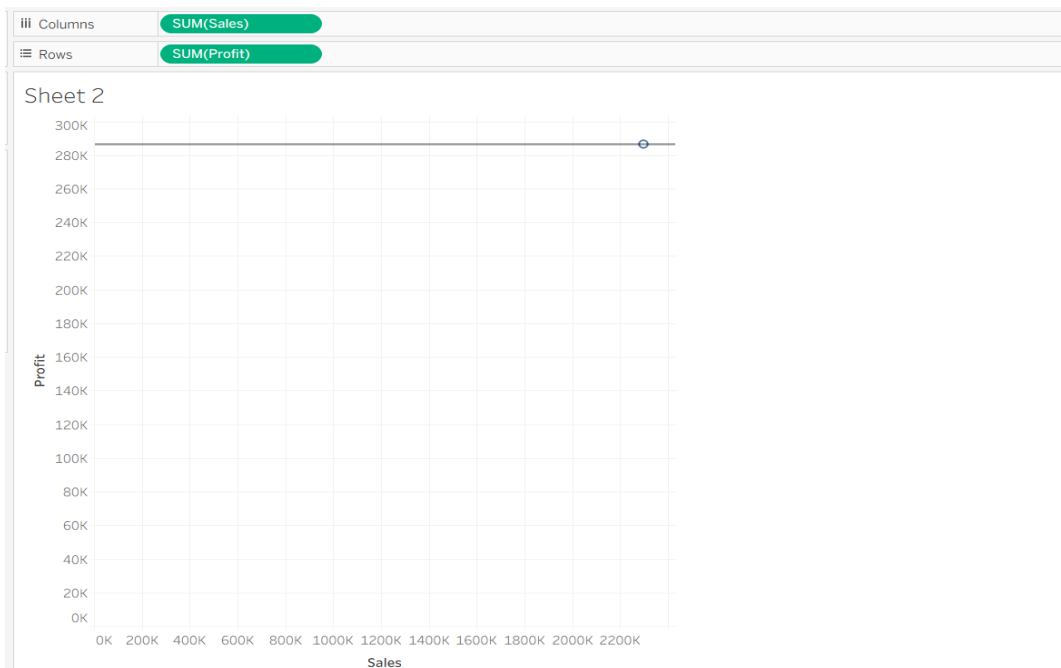

Interpretation: Sales show an overall increasing trend from 2014 to 2017. There is a slight dip around 2015, followed by a sharp rise, indicating business growth and possible seasonal or market improvements.

Scatter Plot (Sales vs Profit with Trend Line)

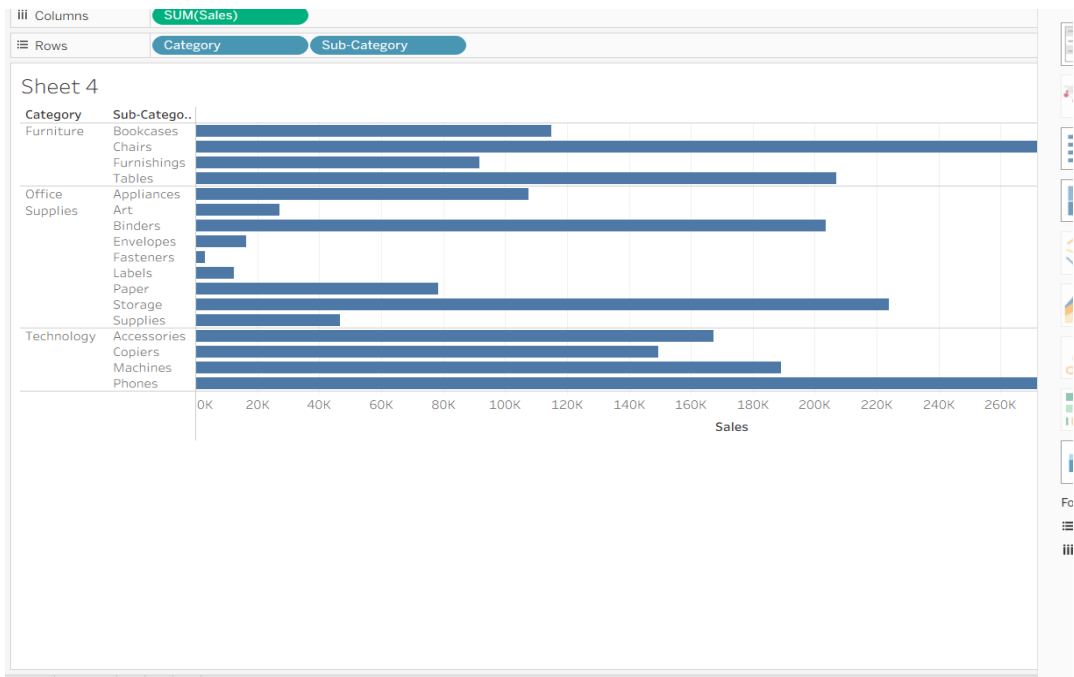

Interpretation: There is a positive relationship between sales and profit. However, some data points show high sales but relatively lower profit, indicating inefficiencies or discounts. The trend line shows overall upward direction.

Trend Line Analysis

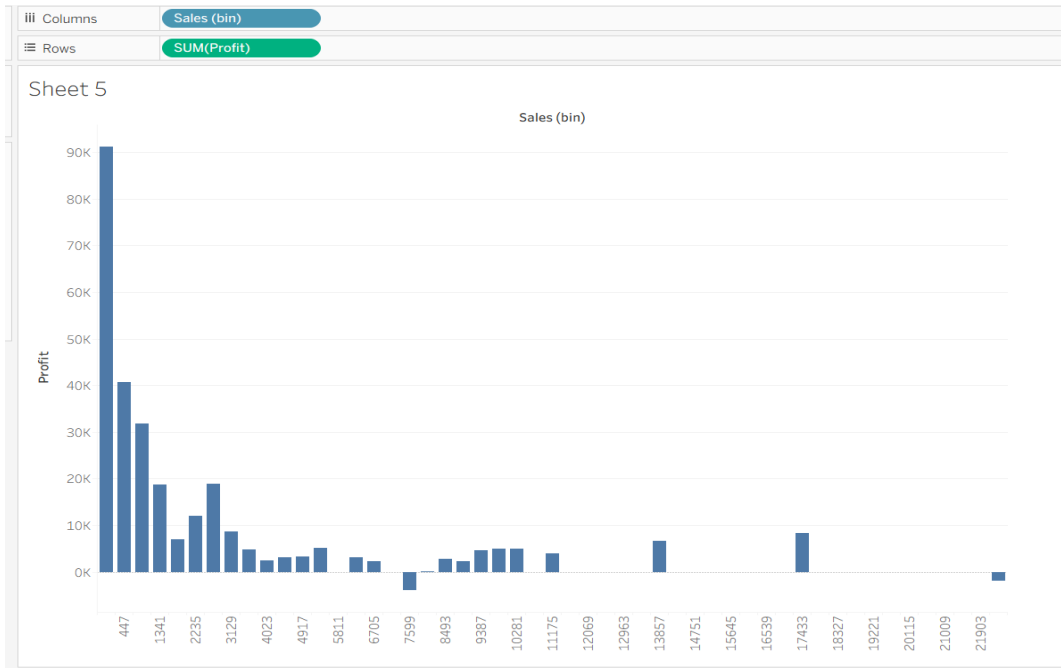

Interpretation: The trend line indicates that as sales increase, profit also increases. However, the flatness suggests profit growth is slower compared to sales.

Bar Chart (Category and Sub-Category Analysis)

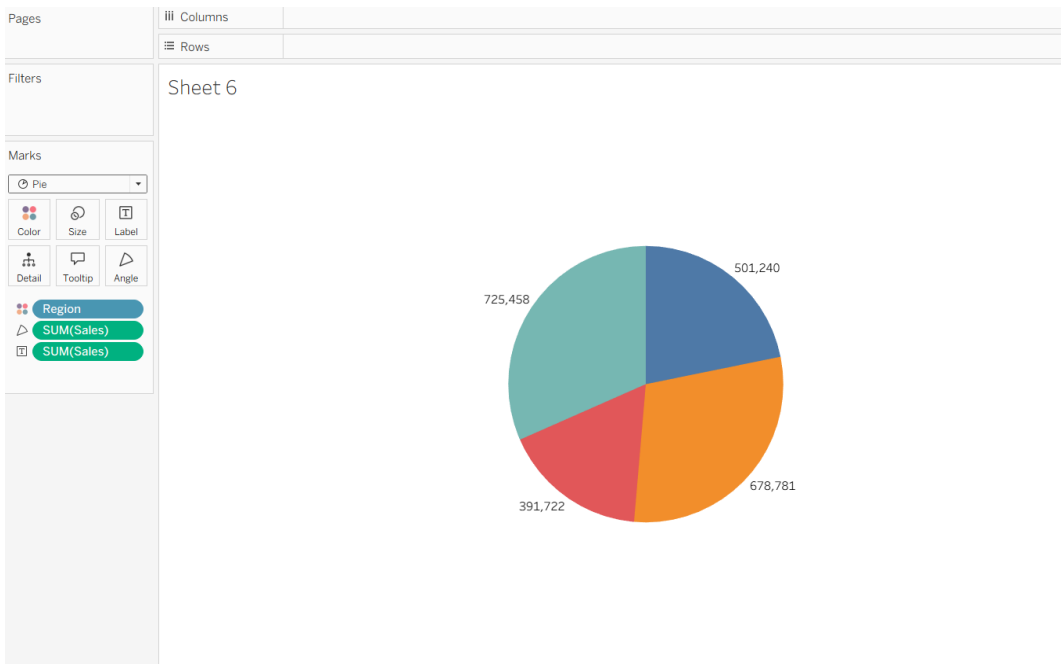

Interpretation: Technology category contributes the highest sales, followed by Office Supplies and Furniture. Some sub-categories perform significantly better than others.

Pie Chart (Region-wise Sales Contribution)

Interpretation: Sales are unevenly distributed across regions. The West region contributes the highest share, while other regions contribute comparatively less.

Histogram (Sales Distribution)

Interpretation: Most sales values are concentrated in lower ranges, with fewer high-value transactions. This indicates a right-skewed distribution.
